SKILLS

Personal
- project management
- cross-functional communication
- quality assurance

Professional
- JavaScript (ES6, ECMA2015)
- TypeScript
- HTML5, CSS3, SASS/SCSS
- SQL

TOOLS

- React.js (Redux), React Native
- Angular.js
- Bootstrap
- Node.js, Express.js
- jQuery
- Swagger
- RESTful API Design
- relational and non-relational databases (MongoDB, postgreSQL)
- Testing: unit, integration, acceptance and E2E test

LANGUAGES

- German: native speaker
- English: prof. working proficiency
- Chinese: fluent

EDUCATION

CareerFoundry GmbH   02 - 08/2022
Full-Stack Web Development (Certificate)

University of Applied Sciences, Konstanz   10/2003 - 04/2009
Business Administration, Chinese (Diploma)

PROJECTS

Movie-Application "Green Screen"
- The objective was to create a movie platform giving users access to movies addressing climate change and to view information about directors and genres. Users could create an account, update their personal data and create a list of favorite movies.
- Implementation:
  - Developed the server-side RESTful API from scratch serving the endpoints for the client-side (Express, MongoDB)
  - Created the client-side from scratch (React, Redux)
  - Applied MVC design pattern
  - Implemented CORS, JWT authentication, authorised via HTTP.
- Worked with: MongoDB, Mongoose, Express, React, Node.js, Redux, Bootstrap, Postman, Swagger, Heroku (and Netlify to test the different requirements for deployment)
- View live page here

Meet Up App
- The objective was to give users access to international frontend meet-ups worldwide and allow filtering by location and number.
- Implementation:
  - Created a fully-tested serverless progressive web application (pwa) using a test-driven development approach (TDD). It reached >90% code coverage.
  - Used external Meetup API to fetch a list of events
  - Handled authentication (OAuth2 with Google API), authorization (AWS Lambda)
  - Visualised events by city in a graph (via chart.js library)
  - Applied an OOP approach to create alerts for users (including an offline alert via service worker)
- Worked with: React, Google Calendar API, Jest, Cucumber, Puppeteer, OAuth2, AWS lambda, APM tool Atatus, OOP, charts.js
- View live app here

EXPERIENCE

Specialist Naming and Branding   07/2012 - 03/2015
BMW AG, Munich
- Created company-wide naming guidelines for car features to ensure a consistent brand identity towards customers
- Steered the internal alignment with stakeholders, departments, and markets to inform/consider all parties involved
- Reviewed marketing material and translations to reduce inconsistency as well as legal repercussions

Project Manager Market Research   10/2009 - 06/2012
trend:research GmbH, Bremen
- Led a team of 3-5, delivered projects within time & budget by optimising task complexity
- Conducted studies helping clients to determine their customers' needs, derive strategies to increase market share
